

GUILHERME TEODORO RODRIGUES

Professional Summary

Automation Specialist & IIoT Integrator High-performance Controls Specialist with 5+ years of experience bridging the gap between Operational Technology (Rockwell Studio 5000 / Siemens TIA) and IT Systems (Python / SQL). Proven track record in commissioning complex machinery and designing custom middleware for data acquisition in regulated sectors (Pharma/Food). Expert in CSA/Z432 safety standards equivalent and high-reliability data pipelines.

- Relocation Status: Eligible for SINP Tech Talent Pathway (No LMIA required). All documentation (ECA/IELTS) ready for immediate application upon Job Approval.

Contact

-  <https://progt07.github.io/Portfolio/>
-  Brazil, Goiânia

Technical Skills

- PLC/HMI: Rockwell Automation (Studio 5000, FactoryTalk View SE/ME), Siemens (TIA Portal S7-1200/1500), Schneider (SoMachine/Vijeo Designer).
- IIoT & Development: Python (Pandas, PyComm3, PyODBC), SQL Server, API Development, RPA (UiPath).
- Industrial Protocols: EtherNet/IP, PROFINET, Modbus TCP, OPC-UA.
- Commissioning: Loop Checks, Electrical Troubleshooting, VFD Configuration (PowerFlex), Safety Systems (LOTO).

Soft Skills

- Problem Solving
- Cross Functional Collaboration
- Process Optimization
- Proactivity
- Hands-on

Languages

- Portuguese: Native
- English: Professional Working Proficiency (IELTS General: CLB 6 - Active learner)

Professional Experience

Automation Software Developer (RPA/OT-IT)

Grupo Odilon Santos | May 2024 - Nov 2025

- Architected and deployed a custom IIoT middleware using Python, creating a direct data pipeline between legacy industrial assets and enterprise SQL databases.
- Engineered a "Store-and-Forward" data architecture to ensure zero data loss during network interruptions, safeguarding critical production metrics (OEE).
- Developed Python scripts to bypass expensive proprietary connectors, achieving a 70% reduction in licensing costs and manual reporting overhead.
- Integrated SQL Server with shop-floor PLCs for real-time Business Intelligence (BI) dashboards, enabling data-driven decision-making for management.

Control Systems Specialist

Brava Soluções | May 2021 - May 2023

- Led the on-site commissioning and start-up of complex automated lines, managing Allen-Bradley ControlLogix and Kinetix Servo systems under strict deadlines.
- Ensured full compliance with machine safety standards equivalent to CSA Z432 (Safeguarding of Machinery) and PHSR protocols during FAT/SAT execution.
- Executed rigorous GAMP 5 validation protocols for pharmaceutical clients, ensuring Data Integrity and 21 CFR Part 11 compliance (Traceability & Audit Trails).
- Diagnosed and resolved critical logic failures in Studio 5000 and electrical faults in VFDs/Instrumentation during high-pressure start-ups, minimizing project delays.

Industrial Automation Analyst

Wtecc Engenharia Ltda. | Brazil | Mar 2020 - Aug 2020

- Optimized manufacturing processes through real-time data analysis, achieving an 18% reduction in material waste. Identified and resolved bottlenecks in automated logic, enhancing overall production efficiency.

Education

Technologist in Industrial Automation

Faculdade de Tecnologia SENAI Ítalo Bologna | 2017-2019

Equivalency: Assessed as a 3-year Canadian Post-Secondary Diploma (IQAS).

R&D Systems Technician (Internship)

Faculdade SENAI Fatesg | Brazil | Jun 2019 - Dec 2019

Developed and tested motion control logic for industrial robotics, focusing on mechatronic system behavior. Documented performance findings and hardware-software integration results for research and development initiatives.
